January 9, 2025

1 Purpose

The purpose of the portfolio is to document your learning, progress, and accomplishments throughout the course. AI is a valuable knowledge asset that can significantly enhance your employability and serve as a strong foundation for further education in graduate schools. This portfolio will serve as a comprehensive record of your engagement with the course material and as a resource to showcase your skills and understanding of artificial intelligence.

2 Ongoing Development

- The portfolio should be developed incrementally throughout the course.
- Update it after completing each significant milestone, such as an assignment, set of quizzes of a chapter, or essay.
- Regularly review and refine the portfolio to ensure it accurately reflects your progress.

3 Portfolio Components

Your portfolio should include the following sections:

3.1 Course Overview

- Provide a brief introduction to the portfolio and the course.
- List the course outcomes (they are listed in the syllabus) and explain how each outcome connects to your learning goals.

3.2 Exams (Midterm and Final)

- Include your performance summary and reflections on the midterm and final exams.
- Reflect on the areas where you excelled and identify topics where you need improvement.

3.3 Programming Assignments

- **Submissions:** Include the final code and a brief explanation of each assignment.
- **Reflections:** Write about the challenges you faced, how you overcame them, and what you learned from each assignment.
- **Demos:** Document your experience presenting the assignment (if applicable). Include feedback received and any subsequent improvements.

3.4 Quizzes

- Summarize your performance on the quizzes.
- Reflect on how the quizzes helped reinforce your understanding of the material.

3.5 Essays and Forums

- Include all essays and links or screenshots of significant forum contributions.
- Summarize the main points of your essays and the discussions you participated in.
- Reflect on how these activities deepened your understanding of AI concepts and practices.

3.6 Teamwork and Collaboration

- Discuss your experience working in teams for demos and other assignments.
- Highlight key lessons learned about collaboration and how it contributed to your learning process.

3.7 Self-Assessment

- Reflect on how well you achieved the course outcomes.
- Include a self-assessment of your strengths and areas for growth in AI.

3.8 Current AI Literature Review

- Provide summaries of any papers, articles, or research materials reviewed during the course.
- Discuss how these works relate to the techniques and concepts learned.

3.9 Applications and Demonstrations

- Document your designs and implementation of AI applications in your programming assignments.
- Include any visual aids, videos, or screenshots of demonstrations.
- Reflect on the AI techniques used and their real-world applicability.

4 Format and Submission

- **Medium:** The portfolio can be a digital document (e.g., PDF, website, or interactive presentation).

- **Structure:** Organize your content clearly, with headings and subheadings for each section.
- **Design:** Ensure the portfolio is visually appealing and professional.
- **Submission Date:** Portfolios are due by May 1, 2025 23:59.

5 Evaluation Criteria

Your portfolio will be evaluated based on the following criteria:

- **Completeness:** Inclusion of all required sections.
- **Depth of Reflection:** Quality and insightfulness of your reflections.
- **Clarity and Organization:** Logical flow and ease of navigation.
- **Presentation:** Professionalism, creativity, and attention to detail.
- **Relevance:** Alignment with the course outcomes and demonstration of your learning.

By following these guidelines, your portfolio will serve as a meaningful representation of your hard work and achievements in this AI course. It will also provide a valuable resource for future endeavors, whether academic or professional.
